ALETHRA FLOW™
Where Clarity Meets Motion

ALETHRA FLOW™
Where Clarity Meets Motion

ALETHRA FLOW™ is the intelligent conveyor verification gate that ensures only authenticated, verified products advance through production.

It synchronizes with ALETHRA SCAN™ and SENSE™ to confirm identity, batch integrity, and compliance—without slowing throughput.

CORE CAPABILITIES

• Real-time conveyor verification

• Batch & sequence integrity enforcement

• Automatic diversion of unverified items

• ALETHRACERTIFIED™ visual status arc

INTEGRATION LOGIC

SCAN™ or SENSE™ → NODE™ → FLOW™
(No device-to-device communication)

HARDWARE

• Electric Red stainless-steel frame

• Adjustable arch (400–1200 mm conveyors)

• Multi-sensor motion tracking

• IP65/67 options

SOFTWARE

• FLOW™ Decision Engine

• Batch integrity guardrails

• TraceChain logging

ACTIVITY CYCLE

• Entry Detection

• Verification Check

• Pass/Alert Decision

• Cloud Logging

SUMMARY

ALETHRA FLOW™ transforms conveyor lines into self-auditing clarity checkpoints, ensuring every product is verified at the exact moment it matters.

"INTELLIGENT CLARITY TECHNOLOGY"
